

## Training school on how to enable Person Centred Care and Health Promotion

COST Action 15222, *Cost Cares*

The Cost Action 15222 *COST CARES*, will, together with Gothenburg Centre for Person Centred Care (GPCC), organize a Training School October 15-17, 2018, in Gothenburg Sweden on the topic of how to enable efficient Person Centred Care (PCC) and Health promotion (HP).

PCC and HP are the two main themes explored by *Cost Cares* to drive affordable high quality health care in the future. Several “enablers” are identified that will facilitate PCC and HC ([see article in The Lancet](#))

The current Training school will be held over three days and include both theoretical and practical components from national and international trainers. The training school will include lectures and a series of workshops where the following themes are addressed:

- Uses and application of PCC in clinical practise and research.
- Health promotion in registries and clinical practice.
- The complexity of implementing PCC and HP.

Please see the attached preliminary schedule for more detailed program. The Training school will also be an opportunity to interact with the Management Committee and the Working Groups of *Cost Cares*.

Participation in the Training school is free of charge and there will be a limited number of grants available for trainees for travel expenses. If you are interested to participate, please mark the dates in your calendar and indicate your interest to participate by filling in the form [here](#).

We very much look forward to hosting the Training School in October.

Inger Ekman

Chair of *Cost Cares*
